1. Crear & Configurar Cuentas en [SendGrid](#)

1. Creación de Cuentas en SendGrid

The screenshot shows the SendGrid signup page. At the top, there is a navigation bar with links to various resources: MVC, PRESTASHOP, PARA FILOSOFAR, EA, .NET, WHITE PAPERS, AMLS, MUSICA, C# ANDROID, Azure, and JAVA. The main heading is "Let's Get Started" with the subtext "Sign up for free. No credit card required." The form includes an "Email Address" field with the value "alex.espejo.cc@gmail.com" and a checkbox "Use email address as username" which is checked. Below this is a "Password" field with a masked password and a toggle to show/hide the password. A note states "Must have at least 16 characters." The form also includes a reCAPTCHA widget with the text "No soy un robot" and a checkbox "I accept the Terms of Service and have read the Privacy Notice" which is checked. A "Create Account" button is at the bottom.

1. Creación de Cuentas en SendGrid

The screenshot shows the SendGrid documentation page for integrating C# with the Web API. The page is titled "Integrate using our Web API or SMTP Relay" and is part of a "Setup Guide" for "Integrate" / "Web API" / "C#". The left sidebar contains a navigation menu with items like Dashboard, Email API, Dynamic Templates, Integration Guide, Marketing, Design Library, Stats, Activity, Suppressions, and Settings. The main content area is titled "How to send email using C#" and lists four steps: 1. Make sure you have the prerequisites, 2. Create an API key, 3. Create an environment variable, and 4. Install the package. Step 2 is currently active, showing a success message and an API key.

How to send email using C#

- 1 Make sure you have the prerequisites**

Our library requires .NET version 4.5.2.
- 2 Create an API key**

This allows your application to authenticate to our API and send mail. You can enable or disable additional permissions on the [API keys page](#).

✓ "Pacagroup.Ecommerce.Services.WebApi" was successfully created and added to the next step.

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
- 3 Create an environment variable**

Update the development environment (user space) with your SENDGRID_API_KEY. For example, in Windows 10, please review [this thread](#).
- 4 Install the package**

Demo

- Creación & Configuración de Cuentas en SendGrid

Happy Coding! 😊
